Fronted by Casey Stickley, Second Echo was conceived in Ohio in the late 1990s. The early years consisted of late night writing sessions in barn lofts, countless hours playing shows in any venue available, and a couple of unproduced albums. The obligatory growing pains for any young band inevitably appeared, but the music never wavered. Second Echo persevered and an EvElution occurred.

Second Echo recently signed with Spectra Music Group and Tabletop Records to release EvElution, a 13-track album demands your attention with excellent hooks, inspiring guitar solos, beautiful melodies, and even a hint of ivory. Weaving together elements of grunge, alternative, and good old fashioned rock n' roll, EvElution is proud that each song has its own identity. That identity is also evident in lyrics that are memorable, powerful, and unapologetically honest. Second Echo has provided the very best they have to offer. No excuses. No Regrets.

The band's influences include Alice In Chains, Pearl Jam, and Soundgarden. Second Echo's bio states that the band "...has a mission to deliver the best guitar-driven rock available." Once you hear their music you will agree they are definitely accomplishing that!

**Released:** Sept 8, 2017
